## ENERGY-OPS SECURITY AGORA

LAGOS - SEPTEMBER 15<sup>TH</sup> 2022

AGORA NEXUS

# AGORA

In ancient Greek cities, an agora was an open space serving as an assembly area and a place for commercial, civic, social, and political activities

# NEXUS

Latin nexus (“the act of binding together; bond”), from nectō (“bind”).

---

Together Agora Nexus has a simple meaning  
**A bonded gathering & market**

Welcome Esteemed Colleagues,

It is fantastic to finally be back in Nigeria for the long-awaited return to the in person Energy-Ops Security Agora here in Lagos.

The pandemic naturally shifted the way of thinking, BCP and the adoption of the 'virtual' world, so I would like to firstly thank you for your continuous involvement as community members and your time investment into attending today's Agora.

It is no secret that the Oil & Energy sector within Nigeria is experiencing some very difficult times with insecurity and many other factors squeezing the industry to almost breaking point.

As we all know, as with any mission critical resource or high value commodity comes the threat and reality of malicious activity whether it be petty criminality and vandalism right the way up to highly organised and sophisticated crime.

With you all having security and operational responsibility within such an important infrastructure, the aim of today and future programmes is to share best practice, benchmark strategies and more importantly have very open and candid debate around issues and 'Wahala' being faced.

That Agora mantra is to ensure that these end user driven meets, are purely focused around the educational and requirement needs of everyone involved.

Today's agenda has been formulated around the issues highlighted by you as a group, so please do continue to influence and advise.

Without sounding like a Roman Emperor this a 'for the people, by the people' initiative so I actively encourage open debate and opinion.

The Agora modus operandi is strict Chatham House Rule to ensure we have a trusted and confidential environment

I look forward to an insightful engagement.

Best,

*Phil Manny*

**Founder & Director.**

# AGENDA

09:00 - 09:30

## Registration & Breakfast Networking

09:30 - 09:45

## Welcome Remarks & House Keeping

Phil Manny - Director & Founder - Agora Nexus

09:45 - 10:45

## Session 1 - Group Workshop

Moderator: Chuks Enwereji, Security Manager West Africa - Shelf Drilling

"The Run up to the election - Outlook and mitigation factors to avoid disruption"

10:45 - 11:30

Weatherford

**Idongesit Udofia**

Senior Security Specialist  
Worley

# Session 1

## The Run up to the Election Outlook and mitigation factors to avoid disruption

Moderator: Chuks Enwereji, Security Manager West Africa - Shelf Drilling

Nigeria is just a few months away from the 2023 elections. Yet dangers loom: risks of electoral violence or disputed election results in a country where political and criminal violence has been reported to have reached new levels.

**CHUKS ENWEREJI**

We will kick start the day with a group workshop where we divide into sub-groups and discuss the current outlook and mitigation factors to avoid disruption.

Following this we will regroup and digest our findings.

The activity although covering the political situation will not focus on political opinion but more so the potential impact pre, during and post-election.

### **TOUCH POINTS**

- Obstructions and effects to our business and operations
- Regional and state differentiators
- Lessons learnt from past experiences
- How we can mitigate moving forward

# Session 6

**DR. TIMOTHY OKON**

## “PIA - Has it really addressed the concerns of the communities, scepticism and are there any potential oversights ”

Leader: Dr. Timothy Okon, CEO - TENO Energy Resources

The Petroleum Industry Act 2021 (PIA) took several years to come into place as a major legislative overhaul.

### It's objectives include:

- To bring legislation to reflect modern times - A lot has changed since the Petroleum Act of 1969 and The Petroleum Profit Tax Act of 1959
- PIA to close gaps in modernisation
- Addresses current stabilization concerns and issues of deindustrialization
- The creation of a system with proper governance - Chapter 4
- Focus on moving away from entitlement and to create economic opportunities, industrialization alongside a competitive investor friendly fiscal regime
- Redevelopment of the Niger Delta
- Introduction of new additional funds for prosperity:  
i.e.
  - Midstream and Downstream Intervention Fund
  - Environmental Fund
  - Decommissioning and Abandonment fund

### TOUCH POINTS

- Concerns and feedback of the host communities
- Is there scepticism and are there any potential oversights
- AOB

Back in November 2021 a Virtual Agora in the form of a panel discussion was ran to explore: Petroleum Industry Act 2021 (PIA) - The potential Impact on Security.

To view full report please scan QR code:

Today, 10 months on, we will reconvene to reflect and debate.
